

MAPin DESIGN THINKING AND STEM BOOTCAMP

BOOTCAMP OVERVIEW

A week long bootcamp for high school students. Students will design solutions to real-world problems. Each team of high school students will be paired with a real client with a disability to design innovative solutions to the challenges clients face day-to-day. Students will learn new skills like 3D printing, coding, and electronics. On the final day each team will showcase their solutions to friends, family, and the general public, celebrating the innovations of our high school change makers.

- **Gained Skills:** 3D Printing, Coding, Electronics
- **The Challenge:** Help a real client with a disability. Design innovative solutions to their everyday challenges.

All interested students and their parents/guardians must attend the mandatory orientation night at the SJECCD Milpitas Extension Center on Thursday, May 9th at 6:30pm to complete the registration process.
