# LEARNING C++ USING THE ARDUINO

- Arduino Is An Open-source Electronics Platform
  - With easy to use hardware & software.
  - Intended for anyone making interactive projects
- Arduino Can Sense & Control It's Environment
  - Receiving information from sensors on input pins
  - Affecting it's surroundings by controlling lights, motors, actuators, etc on output pins
- You Tell Your Arduino What To Do
  - Writing code in the Arduino programming language
  - Using the Arduino development environment

# ARDUINO RUBE GOLDBERG

- Control with an Arduino
- Use 1 or more mechanical devices, like motor, solenoid or servo
- Use 1 or more sensors, like a switch, PIR, motion sensor, IR, magnet, etc...
- Make Stuff Move...

# RUBE GOLDBERG - STUDENT DELIVERABLES

- Completed section in Rube Goldberg “chain of events”
- Collaborate & Negotiate with teams before & ahead in the “chain”
- Development Log Book
  - Design process
  - What worked? / Didn't work? / How you Solved it?
- Source code for
  - Any webserver, scripts, apps, exe that are needed to run their “section” of the chain of Rube Goldberg events
- Teaching Presentation
  - Team presentation to show how their section worked & interacted with others

# MEET MY STUDENTS...

- They come from all over San Jose and Silicon Valley
- Some know they are going to College right after High School
- Many are the first in their family to consider College
- About ½ don't know what the future is after High School
- A few tentatively asked, “Will there be a lot of MATH?”

**But they decided to take a chance on  
Me and my Mechatronics class**

# MY HOPE FOR THEM...

- Expose them to Hands on Engineering
  - Electronics and Programming
  - Fanuc Robot Tool Handling Certification
  - Exposure and Training with Programmable Logic Controllers and Industrial Automation
  - Prep them for a CPA C++ Certification
- Strong Pathway to College Engineering
  - Electrical Engineering
  - Mechanical Engineering
  - Mechatronics Engineering
  - Computer Science
